

Microsoft Teams

TRD Conference Rooms: User Guide

How to Get Started with Microsoft Teams Meetings, Screen Sharing,
and Room Controls at TRD

Overview

The TRD Conference Rooms are equipped with Logitech and Microsoft Teams Rooms technology to make every meeting simple and seamless. This guide will walk you through the basics so you can walk in, get set up, and focus on what matters.

How to Reserve a Conference Room

Room names have been updated. When booking a room for your meeting on Teams/Outlook, search by the new room name or email listed in the table below.

Room	Site	New Room Name	New Room Email
Area 51	Baker	TRD-Area51-CostaMesa	trd-area51-costamesa@toyota.com
Bristol	Baker	TRD-Bristol-CostaMesa	trd-bristol-costamesa@toyota.com
Charlotte	Baker	TRD-Charlotte-CostaMesa	trd-charlotte-costamesa@toyota.com
Daytona	Baker	TRD-Daytona-CostaMesa	trd-daytona-costamesa@toyota.com
Fontana	Baker	TRD-Fontana-CostaMesa	trd-fontana-costamesa@toyota.com
Richmond	Baker	TRD-Richmond-CostaMesa	trd-richmond-costamesa@toyota.com
The Wilson	Baker	TRD-TheWilson-CostaMesa	trd-thewilson-costamesa@toyota.com
Mikron800	Fischer	TRD-Mikron800-CostaMesa	trd-mikron800-costamesa@toyota.com
Mikron1400	Fischer	TRD-Mikron1400-CostaMesa	trd-costamesa-mikron1400@toyota.com
Baja	Irvine	TRD-Baja-Irvine	trd-baja-irvine@toyota.com
Crandon	Irvine	TRD-Crandon-Irvine	trd-crandon-irvine@toyota.com
Mint	Irvine	TRD-Mint-Irvine	trd-mint-irvine@toyota.com

To Book a Room for Teams Meeting via Outlook/Teams:

For New Meetings:

1. Click Calendar in the left sidebar and select New Meeting.
2. In the Add a location or room field, type the room name.

3. Select the room from the dropdown.

4. Fill in your meeting details and send the invite.

For Existing Meetings:

1. In Calendar, find your meeting then click Edit.
2. In the Add a location or room field, type the room name.

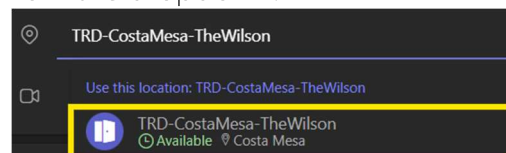

3. Select the room from the dropdown.

4. Confirm your meeting details and send the invite.

To Book a Room for Zoom/Webex Meeting via Outlook/Teams:

1. In Calendar, find your Zoom/Webex meeting then click Edit.
2. In the Add a location or room field, type the room name.
3. Select the room from the dropdown.

4. Confirm your meeting details and send the invite.

How to Join Your Meeting

1. Locate the Tap (the touch screen control panel on the table)
2. Find your meeting on the screen and tap Join.
3. The room display, camera, and speakers will connect automatically.

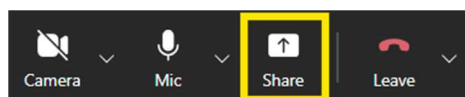

Note: On the Tap, check that mic and camera are ON before speaking.

How to Screenshare During Meetings

Sharing Your Screen Wirelessly: (Recommended)

Join the meeting from your own device and click Share Screen from within the meeting. Please remember to mute your device/your mic to avoid any audio feedback with the room system.

Wired HDMI Connection:

Plug the HDMI cable located in the room into your laptop. You can use it in two ways:

- Display only — your screen will mirror directly to the room display without joining a Teams meeting.
- Share in a meeting — Join meeting first then plug the HDMI cable into your device and your screen will automatically duplicate to the room display.

Ending Your Meeting

1. When your meeting is over, tap End on the Tap screen.
2. Select End for Everyone to close the meeting for all participants.
The room display and camera will turn off automatically.

Note: Always remember to end the meeting from the Tap when you are done so the room is released and available for the next booking.

Mic and Camera Controls

The Logitech peripherals manage camera and audio automatically, so you don't need to set anything up when you walk in. Only adjust the camera angle if necessary.

Mic:

- Most rooms have mic pods on the table for closer audio pickup.
- To mute or unmute, simply tap the 🎤 button on the center of any mic pod.

White light = **unmuted**, Red light = **muted**

Camera:

- The camera will automatically detect people in the room and adjust the camera angle and zoom to frame everyone.
- You can also manually adjust the camera using the **camera remote** located in the room if you need to reframe the shot. (not recommended)

Mic and Camera Features

Mic Pod — Tap to mute or unmute.

White = live, Red = muted

Note: Mic pods are not available in all rooms. Use the Rally Remote or the Tap screen to mute and unmute instead.

Rally Remote — Use to manually adjust camera angle and zoom, speakers, and mic during your meeting. Includes mic mute/unmute, volume up/down, camera direction, and zoom controls, etc. Use 🎯 button to zoom in and out. Use red 🎤 ❌ button to mute mic. Use the directional ring (circular control pad) to pan and tilt the camera left, right, up, or down.

Note: Remote type and color may vary by room.

★ This remote only controls camera, not mic.

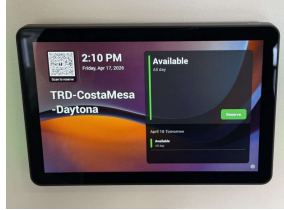

Rally Plus Remote — Same functions as Rally Remote Control. Used to control second camera.

Note: This remote is only found in the larger conference rooms.

Tap Scheduler

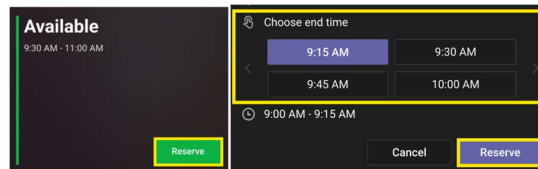

Tap Scheduler is a room booking display located outside each conference room. It shows the room's current availability and allows you to instantly book the space for an ad hoc or walk-in meeting without needing to go through a calendar invite.

Note: Walk-in bookings are best suited for quick in-person meetings. If you need to host a Teams meeting or call, it is recommended to book the room in advance through your Teams/Outlook calendar to ensure availability and proper setup.

Reserving a room on the Tap Scheduler: (Walk-in/in-person meeting only)

1. Locate the Tap Scheduler panel mounted outside the conference room you'd like to use.
2. The display will show the room name, current time, and availability status. If the room is available, the screen will show **Available** with a green **Reserve** button on the right side.
3. Tap **Reserve** on the right side of the screen. A prompt will appear displaying the room name and available end times.
4. Select your desired end time, then tap **Reserve** to confirm your booking.

5. Once confirmed, the display will be updated to show **Reserved** along with your booking time. The room is now successfully booked for your meeting.
